

SANTOSH TAYI

SERVICE TEAM ANALYST III (PRODUCT ANALYTICS) | PRODUCT & BUSINESS ANALYTICS

Hyderabad, India | +91 76840 99109 | santoshtayi1999@gmail.com | [LinkedIn](#)

Portfolio: santoshtayi1999-source.github.io/santoshtayi.github.io

PROFESSIONAL SUMMARY

Product and Data Analyst with 5+ years across analytics, operations and business roles, including 4+ years at Uber. Translate KPI, incident and workflow data into measurable service improvements, scalable operating systems and product decisions. Built escalation models, Jira routing taxonomy, dashboards and SOPs; led high-severity incident response; and mentored 30+ analysts. Currently pursuing an MBA in Business Analytics at BITS Pilani.

SELECTED IMPACT

- Helped prevent an estimated \$200K–\$350K in potential wrongful losses by investigating and overturning a false-positive AON insurance fraud flag.
- Redesigned a single-owner escalation path into a two-tier operating model and built the Jira taxonomy that restored accurate case routing.
- Contributed to an 18% improvement across four service-quality metrics while mentoring 30+ analysts and reducing new-hire ramp time by 25%.

CORE CAPABILITIES

Analytics: SQL, Advanced Excel, Tableau, Power BI, KPI dashboards, trend analysis, root-cause analysis

Product & Operations: Product analytics, workflow design, incident management, process optimisation, Jira, SOP design, quality and risk

Leadership: Cross-functional stakeholder management, executive reporting, coaching, onboarding and change adoption

PROFESSIONAL EXPERIENCE

Service Team Analyst III (Product Analytics) | [Uber](#)

Oct 2025 – Present

- Analyse operational trends across 25 KPIs using SQL and dashboards, surfacing service-quality risks and contributing to an 18% improvement across four key metrics.
- Lead root-cause analysis on recurring issues and translate findings into six process fixes that reduced repeat incidents by 10%.
- Own response for high-priority global driver incidents, coordinating 12 stakeholder teams to resolve cases within an 18-hour SLA.
- Partner with Engineering and Product to prioritise fixes using impact analysis, reducing average issue turnaround from four days to two.

Service Team Analyst II – Bugs & Outages, Tier I → Tier II | [Uber](#)

May 2023 – Oct 2025

- Selected for the pilot launch of the Tier I team; designed triage workflows that stabilised a 100+ case backlog into a sustainable queue.
- Designed a two-tier investigation model and Jira master taxonomy, removing a single point of failure and replacing inconsistent case routing.
- Managed end-to-end driver-account investigations, closing 80+ cases per month with 99% resolution accuracy.
- Authored the team's first operating SOPs, introduced AI-assisted resolution workflows and built coaching frameworks that improved process adherence by 30%.
- Mentored and onboarded 30+ analysts, reducing ramp time by 25%; partnered with Engineering to validate fixes and accelerate turnaround by 20%.

PROFESSIONAL EXPERIENCE — CONTINUED

Service Quality, Risk & Compliance Specialist I | [Uber](#)

Jul 2022 – May 2023

- Audited 80+ cases weekly for compliance and quality risk, helping reduce downstream policy violations by 12%.
- Investigated a suspected AON insurance fraud pattern, confirmed legitimate temporary U.S. driver coverage and helped prevent an estimated \$200K–\$350K in potential wrongful losses.
- Recognised as a Top Performer for four consecutive months while maintaining a 99% quality score.

Business Development Trainee | [BYJU'S](#)

Jan 2022 – Mar 2022

- Redesigned the sales pitch approach and improved meeting-to-close conversion from the company average of 1-in-20 to 1-in-6.
- Closed 50 customer acquisitions and earned team torch-bearer recognition for performance and peer leadership.

Business Development Associate Intern | [Verzeo EduTech](#)

Apr 2021 – Oct 2021

- Owned lead generation, consultative pitching, closure and post-sales support for technology education offerings.
- Implemented chatbot-assisted lead follow-up and converted 75% of qualified leads supplied to the business-development team.

SELECTED PROJECTS

Senior-Friendly Uber Experience | [Cross-Functional Initiative](#)

Ongoing

- Analysed rider usage patterns showing that many rides for customers aged 60+ were booked by adult children, reframing the opportunity from demand creation to usability and assisted access.
- Collaborated with Engineering on a simplified booking concept and dedicated login/account-creation support pathway.

Team Operations Dashboards | [Self-Designed](#)

- Built handoff, productivity and quality dashboards covering Tier I → Tier II timestamps, Cases per Hour, Waiting-on-Reporter rate and Jira QA.

RFM-Based Rider Segmentation | [BITS Pilani MBA Project](#)

Ongoing

- Apply Recency, Frequency and Monetary analysis to define behavioural rider cohorts and translate them into retention and engagement recommendations.

EDUCATION

MBA, Business Analytics | [BITS Pilani – Work Integrated Learning Programmes](#)

2024 – Present

B.Tech, Mechanical Engineering (Automobile) | [KIIT University](#)

2017 – 2021
